Drawings

The drawings were received on May 3, 2006. These drawings are approved by the Examiner.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art teaches related wear-leveling systems but fails to teach the combination including the limitation of:

(Claim 4) "...an access frequency index updating unit operable to add the first value to the access frequency index of a logical page that is mapped according to the mapping information to each physical page retaining original data of cache data stored in the cache storage unit, and to add the second value to the access frequency index of a logical page that is mapped according to the mapping information to each physical page to which modified cache data has been written back";

(Claim 6) "...an access frequency index updating unit operable to compare, for each piece of cache data, (i) the access frequency index of a logical page that is mapped according to the mapping information to a physical page retaining original data of a corresponding piece of cache data and (ii) the cache access frequency index of the corresponding piece of cache data, and to update the access frequency index with the cache access frequency index if the cache access frequency index is greater than the access frequency index";

(Claim 20) "...an access frequency index updating step of adding the first value to the access frequency index of a logical page that is mapped according to the mapping information to each physical page retaining original data of cache data stored in the cache storage unit, and adding the second value to the access frequency index of a logical page that is mapped according to the mapping information to each physical page to which modified cache data has been written back";

(Claim 21) "...an access frequency index updating step of comparing, for each piece of cache data, (i) an access frequency index of a logical page that is mapped according to the mapping information to a physical page retaining original data of a corresponding piece of cache data and (ii) a cache access frequency index of the corresponding piece of cache data, and updating the access frequency index with the cache access frequency index if the cache access frequency index is greater than the access frequency index".

Claims 11 and 19 are allowed as being dependent upon, and thus incorporating therein, the allowable subject matter of the respective parent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
